ACKNOWLEDGEMENT

First, I would like to express my gratitude to my supervisor, Associate Professor Dr. Ibrahim Venkat, for his wise guidance, tolerance and understanding throughout the duration of my study. I would also like to thank Associate Professor Dr. Jayaprakash for his advices on forensic anthropology aspects as I did not have any knowledge about it initially. I am also indebted to Associate Professor Dr. Bahari Belaton for kind assistance and advices which is invaluable to me throughout the difficult times. Next, I am especially grateful to my former supervisor Associate Professor Dr. Iman Yi Liao for her generous technical advices in the pursuit of my Ph.D journey. To Associate Professor Dr. Zainul Ahmad Rajion of the School of Dental Sciences, USM and Dr. Nik Azuan Nik Ismail of the Department of Radiology, HUKM, I would like to thank them for providing the important medical data for this thesis. Also I am grateful to my lab mates Pan Zheng, Chen Junfen, Bisan, Omar and many other friends around me for the discussions, suggestions and kindhearted assistances. I would like to extend my gratitude to the academic and non-academic members of the School of Computer Sciences, USM, for their friendly assistance. I am also thankful to the Malaysian government and the Institute of Postgraduate Studies USM which provide me with the MyPhD and PRGS grants that facilitates my research and life. Last but not least, my deepest gratitude and appreciation to my beloved parents Mr. Tan Tong Hua and Mdm. Ling Siew Nieng whose continuous encouragements, love, care and support throughout the 12 years of my university life were instrumental in helping me to complete this study. And also many thanks to my beloved siblings, other family members and friends for their emotional support and encouragement during my Ph.D study.
