UNIVERSITI SAINS MALAYSIA

**Master of Business Administration**

Second Semester Examination  
Academic Session 2007/2008

April 2008

**AGW 619 - Corporate Finance**

Duration: 3 hours

---

Please check that this examination paper consists of **NINE** pages of printed material before you begin the examination.

Answer any **FIVE** questions.

Question 1

- (a) Given the following information on 3 stocks:

	<b>Stock AA</b>	<b>Stock BB</b>	<b>Stock CC</b>	<b>T- Bills</b>	<b>Market Portfolio</b>
Expected return	.19	.15	.09	.07	.18
Variance	.0200	.1196	.0205	.0000	.0064
Covariance with market portfolio	.007	.0045	.0013	.0000	.0064

Using the CAPM, calculate the expected return for Stocks AA, BB, and CC. Which stocks would you recommend purchasing? (5 marks)

- (b) Given the opportunity to invest in one of the three bonds listed below, which one would you purchase? Explain why. Assume an interest rate of 7%.

<b>Bond</b>	<b>Face Value</b>	<b>Annual Coupon Rate</b>	<b>Maturity</b>	<b>Price</b>
Aaron	RM1,000	4%	1 year	RM990
Baron	RM1,000	7.5%	17 years	RM990
Caron	RM1,000	8.5%	25 years	RM990

[ 10 marks ]

- (c) Explain what are the implications of market efficiency for corporate finance?

[ 5 marks ]

Question 2

- (a) A company with a 20% required rate of return is expected to grow at an accelerated rate of 30% per year for the next 3 years and then continue at a constant growth rate of 8% per year. What would investors be willing to pay for the common stock of this company if the most recent annual dividend was RM2.00 per share?

[ 5 marks ]

- (b) Syarikat Perikanan Azzhar is considering a project that will boost Net Income by RM300,000 each year for the next 8 years. The equipment associated with the project will cost the firm RM1,000,000. This equipment will be straight line depreciated to zero over its 8 year life and has an expected salvage value of zero at the end of the project. Calculate the following assuming a cost of capital of 12%:
- (i) Accounting rate of return
  - (ii) Payback
  - (iii) Discounted payback
  - (iv) Profitability Index

[ 10 marks ]

- (c) Some investors claim to observe patterns in stock market prices. Are such patterns consistent with efficient markets hypothesis? Explain what form of market efficiency is violated if any?

[ 5 marks ]

### Question 3

- (a) In the following scenarios, identify the cost or cash flow and explain how the amount will be included in the capital budgeting analysis or why it will not be included.
- (i) A new machine will increase sales by RM100,000.
  - (ii) The new project will actually reduce sales of another existing product by RM20,000 per year.
  - (iii) The firm's accounts receivable will increase by RM65,000 and accounts payable will increase by RM60,000.
  - (iv) The firm has done a marketing research study costing RM50,000 to determine whether there is enough demand to expand the product market.
  - (v) The firm will experience reduced costs of RM50,000 per year due to the mechanization of the production line with the new equipment.

[ 5 marks ]

- (b) Setia Jati Furniture requires an investment in machinery today of RM20 million. Delivery and set up cost of machinery is RM2 million. That investment can be depreciated for tax purposes straight-line to zero over 5 years. Starting one year from now and ending 5 years from now, the project will generate annual revenues of RM34 million and expenses of RM12 million, both pretax. An immediate working capital investment of RM4 million is required, and working capital will remain at that level each year. Also at end of year 5, the machinery will be sold for RM7 million. The firm is taxed at 30%. An appropriate discount rate is 8%. What is NPV?

[ 10 marks ]

- (c) What are the basic corporate finance functions? Describe ways that managers might use the core principles of finance in performing these basic functions.

[ 5 marks ]

**Question 4**

- (a) Fareen wants to buy a new car upon graduation at age of 24. She is now 17 years old. She expects her new car to cost RM80,000. If she can earn 8% interest on her savings account, which is quarterly compounded, how much does she need to deposit at the end of each quarter so that upon graduation she has the money to buy the car?

[ 5 marks ]

- (b) Utilizing the free cash flow (FCF) approach, calculate the value of a firm's common stock given the following information:

Market value of debt = RM7,500,000

Market value of preferred stock = RM2,500,000

Shares of common stock outstanding = 100,000

Growth rate of 15% for 3 years, followed by a constant 9% annual growth rate thereafter.

Estimated WACC (weighted average cost of capital) of 12%

Past year's FCF = RM450,000

[ 10 marks ]

- (c) The signaling model of dividends assumes that managers use dividends to convey information to poorly informed shareholders. Explain the signaling model of dividends and stock price reactions to dividend changes.

[ 5 marks ]

**Question 5**

- (a) Zaid Company which had 1,000,000 shares outstanding paid a stock dividend of 5% to the shareholders. The stock is selling for RM14 a share, while the stated par value is RM3.00 a share. Determine the new equity accounts if Zaid's original accounts were:

Common Stock (Par value RM3 (1,000,000 shares	RM3,000,000
outstanding)	

Retained Earnings	<u>2,000,000</u>
-------------------	------------------

Total Owner's Equity	RM5,000,000
----------------------	-------------

[ 5 marks ]

- 5 -

- (b) Global Properties Corporation has 12,000 bonds outstanding with a market price of RM105 per bond. The firm also has 30,000 preferred shares outstanding and 35,000 common shares outstanding. Preferred stock and common stock are both expected to pay a year-end dividend of RM2.30 per share. The current price per share of common stock is RM37 per share. Preferred stock is priced at RM52 per share. Preferred dividends do not grow and common stock dividends are expected to grow at a rate of 4 percent. The firm's tax rate is 35 percent. If the yield on the firm's bonds is 7%, what is the firm's weighted average cost of capital?

[ 10 marks ]

- (c) Explain the factors that determine beta and how an asset beta can differ from equity betas.

[ 5 marks ]

#### Question 6

- (a) Assume you own 5000 shares of a corporation that pays a 10% stock dividend when its stock price is RM4.40 per share. Assuming no personal taxes, show and discuss the theoretical impact on your wealth from this dividend.

[ 5 marks ]

- (b) There are two firms, BW and GT. Each has expected Net Operating Income (NOI) of RM5 million each year forever, and the NOI to BW will always be exactly the same as that to GT, whether it ends up above or below the expected amount. After any interest payments, all income is paid out to equity holders. BW is all equity (stock). GT has some equity, along with RM22 million (market value and face value) in perpetual debt. GT's debt pays risk-free 5% interest each year, while BW has expected return on its equity of  $6\frac{2}{3}\%$ . There are no taxes, and the rest of the Modigliani-Miller assumptions hold.

- (i) What is the value of BW equity?
- (ii) What is the value of GT equity?
- (iii) What is the expected cash flow to GT equity holders each year?
- (iv) What is the expected return on GT stock

[ 10 marks ]

- (c) Explain Miller's claim that capital structure should not matter, even in the presence of corporate and personal taxes.

[ 5 marks ]

Table A-1 Present Value of \$1 Due at the End of n Periods:

Period	$PVIF_{k,n} = \frac{1}{(1 + k)^n}$
