

**THE SUSTAINABILITY OF COMMUNICATION  
FOR BEHAVIOURAL IMPACT (COMBI)  
PROGRAMME IN THE PREVENTION AND  
CONTROL OF DENGUE IN KELANTAN**

**By**

**DR ABDULLAH HUSAM BIN A SHUKOR**

**Thesis submitted in fulfillment of the requirements  
for the degree of  
Doctor of Public Health (Epidemiology)**

**UNIVERSITI SAINS MALAYSIA  
MAY 2014**

## **ACKNOWLEDGEMENTS**

Bismillahirrahmaanirrohim

Praise to Allah S.W.T, the most compassionate and most merciful, whose blessing has helped me through the entire completion of this study. I would like to express my utmost gratitude to the following individuals and institutions that have helped me during the course of this study:

- My supervisor, Associate Professor Dr Mohamed Rusli Bin Abdullah for his support, comments, suggestions, valued advices and contribution of his time.
- My co-supervisor, Associate Professor Dr Halim Bin Salleh for his expert guidance, constructive advices, comments and support.
- Universiti Sains Malaysia for the support and financial assistance (RM29, 960 via Short Term Grant 304/PPSP/61312045).
- All lecturers, staff and colleagues at the Department of Community Medicine, Universiti Sains Malaysia for their kind support.
- Staff at the State Health Department of Kelantan, the District Health Office of Tanah Merah and Bachok for their valuable cooperation and support.
- My beloved wife, Dr Siti Hajar Binti Umar, and three adorable children, Ahmad Muaz, Ahmad Miqdad and Ahmad Mus'ab for their encouragement and support.
- My parents who gave great support and spared their time for the success of this study.
- Last but not least, all the participants who were willing to give their cooperation to involve in this study.

## TABLE OF CONTENTS

ACKNOWLEDGEMENTS .....	ii
TABLOF CONTENTS .....	iii
LIST OF TABLES .....	xiii
LIST OF FIGURE .....	xv
LIST OF SYMBOLS AND ABBREVIATIONS .....	xvi
GLOSSARY .....	xix
ABSTRAK .....	xxiv
ABSTRACT .....	xxviii
CHAPTER ONE: INTRODUCTION .....	1
1.1    Introduction .....	1
1.2    National dengue control programme in Malaysia .....	1
1.3    Principles of COMBI programme .....	4
1.4    COMBI programme for dengue disease .....	6
1.5    COMBI programme in Malaysia .....	7
1.6    Sustainability of COMBI programme .....	10
1.7    The problem of the study .....	11
1.8    Justification of the study .....	12
1.9    Structure of the thesis .....	12
1.10    Conclusions .....	14
CHAPTER TWO: LITERATURE REVIEW .....	15
2.1    Introduction .....	15

2.2	Dengue .....	15
2.2.1	Global picture of dengue .....	15
2.2.2	Dengue in Malaysia .....	17
2.2.3	Dengue virus .....	18
2.2.4	Clinical manifestations of dengue .....	20
2.2.5	Vector of dengue .....	21
2.2.6	Dengue vector surveillance .....	24
2.3	Vertical and community-based dengue control programmes .....	26
2.4	Concept of programme sustainability .....	28
2.4.1	Definition of sustainability .....	28
2.4.2	Evaluation of sustainability .....	31
2.5	Framework of evaluating the sustainability of COMBI programme	32
2.5.1	Maintenance of health benefits achieved through the initial COMBI programme .....	33
2.5.2	Continuation of COMBI programme activities .....	33
2.5.3	Capacity building in a community .....	34
2.6	Factors affecting the sustainability of COMBI programme .....	40
2.6.1	Programme design and implementation factors .....	40
2.6.2	Factors within the organisational setting .....	43
2.6.3	Factors in the broader community environment .....	45
2.7	Conclusions .....	46

CHAPTER THREE: OBJECTIVES, RESEARCH QUESTIONS, HYPOTHESES AND SUPPOSITIONS .....	49	
3.1	Introduction .....	49

3.2	<b>Objectives .....</b>	49
3.2.1	<b>General objective .....</b>	49
3.2.2	<b>Specific objectives .....</b>	49
3.3	<b>Research questions .....</b>	51
3.4	<b>Hypotheses of the study .....</b>	52
3.5	<b>Suppositions of the study .....</b>	52
3.6	<b>Conclusions .....</b>	52
 <b>CHAPTER FOUR: METHODOLOGY .....</b>		
4.1	<b>Introduction .....</b>	54
4.2	<b>Study area .....</b>	54
4.2.1	<b>Kelantan .....</b>	55
4.2.2	<b>Kampung Nelayan Kandis .....</b>	55
4.2.3	<b>Kampung Nipah .....</b>	56
4.2.4	<b>Kampung Batang Merbau .....</b>	56
4.2.5	<b>Kampung Rawa .....</b>	56
4.3	<b>Study design .....</b>	57
4.4	<b>Study tool of assessment to evaluate the sustainability of COMBI programme .....</b>	58
4.4.1	<b>Indicators to evaluate the sustainability of COMBI programme .....</b>	59
4.4.2	<b>'Five-Point Scale' measurement tool .....</b>	62
4.4.3	<b>'Five-Interval Sustainability Score' .....</b>	64
4.5	<b>Duration and conduct of the study .....</b>	65
4.6	<b>Quantitative component .....</b>	66

4.6.1 Quantitative study population .....	66
4.6.2 Inclusion and exclusion criteria .....	66
4.6.3 Quantitative sample size determination .....	66
4.6.3.1 Sample size calculation of the first specific objective .....	67
4.6.3.2 Sample size calculation of the second, third and fourth specific objectives .....	68
4.6.3.2.1 Sample size calculation of the second specific objectives .....	69
4.6.3.2.2 Sample size calculation of the third and fourth specific objectives .....	70
4.6.4 Quantitative sampling method .....	71
4.6.5 Quantitative study tool .....	72
4.6.5.1 KAP questionnaire .....	72
4.6.6 Quantitative data collection .....	75
4.6.6.1 Number of new dengue cases and entomological indices .....	75
4.6.6.2 KAP survey in 2008 .....	78
4.6.6.3 KAP survey in 2012 .....	79
4.6.7 Quantitative statistical analysis .....	79
4.6.7.1 Socio-demographic characteristic of KAP respondents .....	80
4.6.7.2 Chi-square and Fisher's Exact tests .....	80
4.6.7.3 Independent t-test .....	82
4.6.7.4 Mann-Whitney test .....	84

4.7	Qualitative component .....	85
4.7.1	Using qualitative research method .....	85
4.7.2	Qualitative sample selection and size .....	86
4.7.3	Qualitative data collection .....	87
4.7.3.1	In-depth interview .....	87
4.7.3.2	Recruitment of the participants .....	88
4.7.3.3	Interview setting .....	89
4.7.3.4	Interview session .....	89
4.7.3.5	Document review .....	91
4.7.4	Qualitative data analysis .....	92
4.7.5	Rigour in qualitative component .....	95
4.8	Ethical issues .....	97
4.9	Conclusions .....	98

<b>CHAPTER FIVE: EVALUATION OF THE SUSTAINABILITY OF COMBI PROGRAMME .....</b>		<b>99</b>
5.1	Introduction .....	99
5.2	Socio-demographic characteristics of respondents in the KAP surveys .....	99
5.2.1	KAP surveys in 2012 .....	99
5.2.2	KAP survey in Kampung Batang Merbau, 2008 .....	103
5.3	Backgrounds of in-depth interview participants .....	105
5.4	Maintenance of health benefits achieved through the initial COMBI programme .....	105
5.4.1	Incidence rate of dengue .....	105

5.4.2	Entomological indices .....	109
5.4.3	KAP of households on dengue prevention and control .....	112
5.5	Continuation of COMBI programme activities .....	115
5.5.1	Activities of community COMBI committee on dengue prevention and control .....	115
5.5.2	Elimination of <i>Aedes</i> breeding sites around houses .....	117
5.5.3	Activities of social, non-governmental and other organisations on dengue prevention and control .....	118
5.5.4	Activities of reporting system .....	120
5.6	Capacity building in a community .....	122
5.6.1	Participation .....	122
5.6.2	Leadership .....	125
5.6.3	Organisational structures .....	127
5.6.4	Resources mobilisation .....	129
5.6.5	Linkages .....	131
5.6.6	Problem assessment .....	132
5.6.7	Programme management .....	133
5.7	Sustainability of COMBI programme in KNK and KBM .....	135
5.8	Conclusions .....	138

CHAPTER SIX: FACTORS AFFECTING THE SUSTAINABILITY OF COMBI PROGRAMME .....	139	
6.1	Introduction .....	139
6.2	Factors affecting the sustainability of COMBI programme in KNK .....	141
6.2.1	Solid socio-cultural foundation for dengue control .....	141

6.2.1.1 Good knowledge and favourable community	
attitude towards dengue control .....	142
6.2.1.2 Collective decision making .....	143
6.2.1.3 Social mobilisation to support government initiated projects .....	145
6.2.2 Organisational structures.....	146
6.2.2.1 Integration of the CCC with existing organisation in the community .....	147
6.2.2.2 Finance and resources for COMBI programme .....	148
6.2.2.3 Motivation of committee members to control dengue .....	150
6.2.3 Credibility and quality of leadership .....	151
6.2.3.1 Cross-cutting leadership .....	152
6.2.3.2 Personal qualities of leaders .....	153
6.2.4 Role of women .....	155
6.2.4.1 Women leaders .....	156
6.2.4.2 Mobilisation of women .....	158
6.3 Factors affecting the sustainability of COMBI programme in KBM	159
6.3.1 Dependence on the DHOTM .....	160
6.3.1.1 Ownership of COMBI programme .....	161
6.3.1.2 Role of the DHOTM .....	162
6.3.2 Weak socio-cultural foundation for dengue control .....	163
6.3.2.1 Diffused leadership .....	164
6.3.2.2 Inter-organisational support .....	165
6.3.2.3 Politically divided community .....	166

6.4	Conclusions .....	167
<b>CHAPTER SEVEN: DISCUSSION .....</b>		<b>169</b>
7.1	Introduction .....	169
7.2	Evaluation of the sustainability of COMBI programme .....	169
7.2.1	Type of evaluation of community-based programme .....	169
7.2.2	Study tool of assessment .....	173
7.2.3	Maintenance of health benefits achieved through the initial COMBI programme .....	176
7.2.4	Continuation of COMBI programme activities .....	180
7.2.5	Community capacity .....	183
7.2.5.1	Participation .....	184
7.2.5.2	Leadership .....	185
7.2.5.3	Organisational structures .....	187
7.2.5.4	Resources mobilisation .....	188
7.2.5.5	Linkages .....	189
7.2.5.6	Problem assessment .....	190
7.2.5.7	Programme management .....	191
7.3	Factors influencing the sustainability of COMBI programme .....	192
7.3.1	Socio-cultural foundation for dengue control .....	193
7.3.2	Networking with other organisations or individuals .....	197
7.3.3	Leadership ability .....	198
7.3.4	Ownership and belonging to the programme .....	200
7.3.5	Community and political ideology .....	202
7.3.6	Women's involvement .....	203

7.4	Conclusions .....	205
<b>CHAPTER EIGHT: CONCLUSIONS .....</b>		<b>208</b>
8.1	Introduction .....	208
8.2	Conclusions of the study .....	208
8.3	Concluding remarks .....	210
<b>CHAPTER NINE: LIMITATIONS AND RECOMMENDATIONS .....</b>		<b>212</b>
9.1	Introduction .....	212
9.2	Limitations of the study .....	212
9.3	Recommendations .....	218
9.4	Conclusions .....	220

UKKS	Unit Kawalan Keselamatan Kampung Sukarela Mukim Bachok dan Mukim Nipah
UMNO	United Malays National Organisation
US\$	United States dollar
WHO	World Health Organisation

## GLOSSARY

**1Malaysia Community (Komuniti 1Malaysia or K1M):** This organisation was established by the Ministry of Communications and Multimedia to implement 1Malaysia Appreciation Programme at the community level. Activities of this programme include exhibitions, village feast get-together, cultural performances and community sporting events. K1M also organises religious activities, independence celebration activities and study tours (DOI, 2012).

***Aedes index (AI):*** The percentage of houses infested with *Aedes species (Ae. spp)* larvae and/or pupae (MOH, 2005a; WHO, 2009) as follows:

$$AI = \frac{\text{Number of infested houses}}{\text{Number of inspected houses}} \times 100$$

**Amanah Ikhtiar Malaysia (AIM) microcredit scheme:** The primary objective of this scheme is to reduce the rate of poverty in the community by providing financial loans to poor households. The minimum amount of loan starts at RM500 with a repayment period of 25 weeks to a maximum of RM20000 with a repayment period of six months. The households are expected to use the loan to improve their household income by undertaking viable economic activities such as small trading. Loan participants are required to go through a compulsory skills development course at the point of joining the scheme after which they are required to attend weekly meetings among group members (Saad, 2011; AIM, 2012).

**Area Farmers Organisation (Pertubuhan Peladang Kawasan or PPK):** The role of PPK is to enhance rapid growth of the agricultural sector by restructuring agriculture and improving the productivity of farmers through provision of services. PPK is also responsible to enhance business and investment growth in agriculture, and improve the quality of life and socio-economic conditions of farmers (FOA, 2012).

**Breteau index (BI):** The number of positive containers with *Ae. spp* larvae and/or pupae per 100 houses inspected (MOH, 2005a; WHO, 2009) as follows:

$$BI = \frac{\text{Number of positive containers}}{\text{Number of inspected houses}} \times 100$$

**Community COMBI committee (CCC):** A group of people appointed by the Ministry of Health Malaysia (MOH) to implement Communication for Behavioural Impact (COMBI) programme activities for the prevention and control of dengue in their community.

**Container index:** The percentage of water-holding containers infested with *Ae. spp* larvae and/or pupae (MOH, 2005a; WHO, 2009) as follows:

$$CI = \frac{\text{Number of positive containers}}{\text{Number of inspected containers}} \times 100$$

**Control areas:** The areas that were not involved in COMBI programme in Kelantan.

**Daya Wawasan Movement (Gerakan Daya Wawasan or GDW):** This organisation was established by Jabatan Kemajuan Masyarakat (KEMAS) of the Ministry of Rural and Regional Development. The objectives of GDW are to make a paradigm shift in attitude, practice and inspiration among rural community (Balwi and Koharuddin, 2005).

**Development and Village Security Committee (Jawatankuasa Kemajuan dan Keselamatan Kampung or JKKK):** This committee is established by the state government as an agent of administrative and community development at the local level. The head and members of this committee are given skill training in the aspects of administration, organisation, development and management to create an independent and proactive community. They are also responsible to implement various state government programmes in their community such as economic and infrastructure developmental programme, general assistance programme, and poverty eradication programme (D'Silva *et al.*, 2009; Kuhonta, 2011).

**eDengue:** Web-based application that is used by the MOH to monitor notification, laboratory result, re-notification, case investigation, vector control, health education activities, enforcement activities, COMBI programme activities and entomological indices of dengue (MOH, 2013b).

## **Federal Development and Village Security Committee (Jawatankuasa**

**Kemajuan dan Keselamatan Kampung Persekutuan or JKKKP):** Similar to JKKK (above), the federal government sets up its own state administrative structure with head and members of JKKKP appointed to handle socio-political affairs and execute federal government programmes at the local level (Wong, 2009).

**Medan Info Desa (MID):** This local information centre is a physical entity filled with information and communications technology (ICT) infrastructures located in rural areas. It is a systematic and integrated effort by the Ministry of Rural and Regional Development to instil and promote ICT among rural communities. Basic services of MID are ICT skills trainings, computer and internet services, computer printing and website services (Ibrahim *et al.*, 2010b).

**More than five years intervention area:** The intervention area in Kelantan where their 12-week intensive COMBI campaign ended at least five to six years ago.

**More than three years intervention area:** The intervention area in Kelantan where their 12-week intensive COMBI campaign ended at least three to four years ago.

**Neighbourhood Watch Group (Kawasan Rukun Tetangga or KRT):** This an organised group of residents devoted to crime and vandalism prevention within a community. The main role of KRT is to organise groups for patrol duty at night to reduce crime in surrounding neighbourhoods. Further, each KRT is encouraged to organise community, welfare or education activities in order to promote and strengthen racial unity and integration (DNUI, 2012).

**Rubber Industry Smallholders Development Authority (RISDA):** This federal government agency was established to create a progressive and prosperous smallholder community through agriculture and commercial activities. In order to achieve this mission, it adopts various integrated and systematic approach programme such as individual and group replanting/new planting, the setting of development centres to purchase smallholder rubbers, credit facilities for agricultural input and smallholder training (RISDA, 2012).

## **ABSTRAK**

Kelangsungan program Komunikasi untuk Perubahan Tingkah Laku (COMBI) dalam pencegahan dan pengawalan denggi di Kelantan.

**Pengenalan:** Program COMBI adalah salah satu langkah Kementerian Kesihatan Malaysia (MOH) mencegah dan mengawal denggi. Program ini menggunakan konsep proses mobilisasi sosial dalam menggalakkan individu dan keluarga mereka mengambil tindakan yang sesuai terhadap denggi. Kelangsungan program ini tidak pernah dinilai walaupun ia telah dilaksanakan sejak 10 tahun yang lepas di Kelantan.

**Objektif:** Kajian ini bertujuan untuk menilai status kelangsungan dan menerangkan faktor-faktor yang mempengaruhi kelangsungan program COMBI di Kelantan.

**Kaedah kajian:** Kajian menggunakan gabungan kaedah kuantitatif dan kualitatif dalam kajian komuniti yang bukan rawak dan hirisan lintang secara perbandingan. Kampung Nelayan Kandis (KNK) dan Kampung Batang Merbau (KBM) telah dipilih sebagai kawasan intervensi. Kampung Nipah (KN) adalah kawasan kawalan untuk KNK dan Kampung Rawa (KR) adalah kawasan kawalan untuk KBM. Kaedah kuantitatif pada kajian ini melibatkan data sekunder dan tinjauan tentang pengetahuan, sikap dan amalan (KAP). Kaedah kualitatif yang digunakan dalam kajian ini adalah temubual secara mendalam dan analisis dokumen. Bahagian pertama kajian ini menggabungkan kaedah kualitatif dan kuantitatif dalam menilai prestasi program COMBI sama ada ia masih berlangsung ataupun tidak sekurang-kurangnya tiga atau lima tahun selepas tamat aktiviti-aktiviti rasmi program. Empat
