
UNIVERSITI SAINS MALAYSIA

First Semester Examination
Academic Session 2006/2007

October/November 2006

RMK 359 – Construction Economics 1
(Ekonomi Binaan 1)

Duration: 3 hours
(Masa: 3 jam)

Please check that this examination paper consists of **FORTY THREE** pages of printed material before you begin the examination.

*Sila pastikan bahawa kertas peperiksaan ini mengandungi **EMPAT PULUH TIGA** muka surat yang tercetak sebelum anda memulakan peperiksaan ini.*

Students are allowed to answer all questions in English OR in Bahasa Malaysia.

Pelajar dibenarkan menjawab semua soalan dalam Bahasa Inggeris ATAU Bahasa Malaysia.

Answer **THREE** questions only. **Question 1** is **COMPULSORY** and answer any **TWO** other questions.

*Jawab **TIGA** soalan sahaja. **Soalan 1** adalah **WAJIB** dan jawab mana-mana **DUA** soalan lain.*

- 2 -

1. In August 2006, your firm has been appointed Quantity Surveyors for a project as indicated in the 'Concept Sketches'; in "**Lampiran A1**". Details of the project are as follows:-

- Project : Proposed Administrative Office
- Classification : Administrative Building
- Place : Jalan Langgar, Alor Setar, Kedah
- General Project Information :
 - Use the dimensions as indicated in the sketches to obtain the Gross Floor Area (GFA).
 - The client wants to add new spaces by adding two (2) levels of basement for carparks.
 - Sketches for the rooms (Intermediate floor) are now changed to offices.
 - Site area – 0.5 hectare
 - Form of Contract – CIDB 2000

Based on the 'Concept Sketches' (**Lampiran A1**) and referring to the guide cost analysis and Special Release 2 Index (**Lampiran A2 - A3**) as well as the details provided under **Lampiran B**.

- (a) Prepare an Elemental Cost Plan that is complete by utilizing the form provided (**Lampiran C**) and advice the client on the following:-

- (i) Total Building Cost (including Preliminaries and Contingencies).
- (ii) Total Cost of Overall Development.
- (iii) Computations of the Gross Floor Area (GFA) in detail.

(20 marks/markah)

...3/-

- 3 -

- (b) Indicate clearly the indices and index numbers that have been adopted.

(4 marks/markah)

- (c) The Client has made several changes to the initial sketches, i.e. adding two (2) basement floors and changing the function from a hotel to an office. Explain from a Building Economics perspective, the effects of these changes with regards to:-

- Finishes
- Method of Construction
- Services
- Work Below Ground Level

(12 marks/markah)

- (d) The client has capped the budget in the region of RM 6.3 million (including land cost); explain how this budgetary cap may be achieved and the steps required to fulfill the client's needs.

(6 marks/markah)

- (e) Explain how the use of the CIDB 2000 Standard Form of Contract can influence the costs of this project.

(4 marks/markah)

- (f) Differentiate between the Cost Plan prepared and that of an estimate.

(4 marks/markah)

Pada bulan Ogos 2006, firma anda telah dilantik sebagai Juruukur Bahan untuk melaksanakan sebuah projek seperti mana 'Concept Sketches' dalam **Lampiran A1**. Butiran-butiran projek adalah seperti berikut:-

- Projek : Cadangan Pejabat Pentadbiran
- Pengelasan : Bangunan Pentadbiran
- Tempat : Jalan Langgar, Alor Setar, Kedah
- Maklumat Am Projek :

 - Gunakan dimensi seperti mana tertera dalam lakaran untuk mendapatkan luasan lantai kasar (GFA).
 - Pihak Klien mahukan ruang ditambahkan melalui dua tingkat basement untuk kegunaan carpark.
 - Lakaran untuk bilik-bilik (Intermediate floor) ditukar menjadi ruang-ruang pejabat.
 - Keluasan – 0.5 hektar
 - Borang Kontrak – CIDB 2000

Berpandukan 'Concept Sketches' (**Lampiran A1**) serta merujuk kepada analisis kos panduan dan indeks Siaran Khas 2 (**Lampiran A2 - A3**) dan butiran-butiran lanjutan (**Lampiran B**) yang dibekalkan.

- (a) Sediakan Pelan Kos Berelemen yang kemas dan lengkap dengan mengisi boring yang disediakan (**Lampiran C**) dan nasihatkan pihak klien tentang:-
- (i) Jumlah Kos Bangunan (termasuk 'Preliminaries' and Kontingensi).
 - (ii) Jumlah Kos Pembangunan Keseluruhan
 - (iii) Perkiraan Luasan Lantai Kasar (GFA) secara terperinci

(20 marks/markah)

- 5 -

- (b) Tunjukkan dengan jelas kaedah penyelarasan indeks-indeks yang telah dikenalpasti.

(4 marks/markah)

- (c) Pihak klien telah membuat beberapa perubahan daripada lakaran asal, iaitu menambah dua tingkat 'basement' dan menukar fungsi asal daripada sebuah hotel kepada sebuah pejabat. Jelaskan dari sudut Ekonomi Bangunan kesan-kesan perubahan ini yang bersabit dengan:-

- Kemasan-kemasan
- Kaedah Pembinaan
- Perkhidmatan
- Kerja-kerja di bawah tanah

(12 marks/markah)

- (d) Pihak klien telah menetapkan belanjawan projek dihadkan dalam lingkungan RM 6.3 juta (termasuk harga tanah); jelaskan samada had belanjawan ini boleh dicapai serta nyatakan langkah-langkah yang perlu diambil bagi memenuhi kehendak klien ini.

(6 marks/markah)

- (e) Jelaskan bagaimana penggunaan Borang Kontrak CIDB 2000 boleh mempengaruhi kos projek ini.

(4 marks/markah)

- (f) Bezakan Rancangan Kos yang telah disediakan dengan anggaran biasa.

(4 marks/markah)

- 6 -

2. (a) By using appropriate illustrations, prepare a chart consisting of cost activities and functions based upon the RIBA Plan of Work. Elaborate with regards to the various important documents prepared by the Quantity Surveyor at the various phases.

(12 marks/markah)

- (b) Describe the main characteristics inherent in a Building Economics Report and relate them to the 'Elemental Cost Analysis' (ECA).

(8 marks/markah)

- (c) Briefly, discuss the differences between the RIBA Plan of Work and NPWC nomenclatures.

(5 marks/markah)

- (a) *Dengan menggunakan gambarajah, sediakan suatu carta aktiviti dan fungsi kos yang berpandukan RIBA Plan of Work. Jelaskan juga tentang dokumen-dokumen yang penting yang disediakan oleh seorang Juruukur Bahan ditahap-tahap tertentu.*

(12 marks/markah)

- (b) *Nyatakan ciri-ciri utama yang harus ada dalam penyediaan suatu laporan Ekonomi Bangunan serta kaitkannya dengan 'Elemental Cost Analysis' (ECA).*

(8 marks/markah)

- (c) *Bezakan secara ringkas nomenklatur RIBA Plan of Work dengan yang diajukan oleh NPWC.*

(5 marks/markah)

- 7 -

3. (a) Discuss the concept of Construction Economics with regards to its purpose, objectives and aims in relation to deriving projects that are optimum in terms of cost. Use appropriate illustrations in your answers.

(9 marks/markah)

- (b) "The Principles of Cost Control ensures that appropriate costing input will be focused at various levels of activities encompassing all phases".

Discuss.

(9 marks/markah)

- (c) Briefly describe:-

- (i) the purposes of Estimates
(ii) the Cost Planning Concept Map, with sketches.

(7 marks/markah)

- (a) *Bincangkan tentang konsep Ekonomi Binaan serta matlamat, objektif dan tujuannya dari sudut penghasilan suatu projek yang optimum dari segi kos. Gunakan lakaran yang wajar dalam jawapan anda.*

(9 marks/markah)

- (b) *"Prinsip-prinsip Kawalan Kos memastikan bahawa kegiatan-kegiatan di kesemua tahap akan mendapat tumpuan kos yang sewajarnya"*

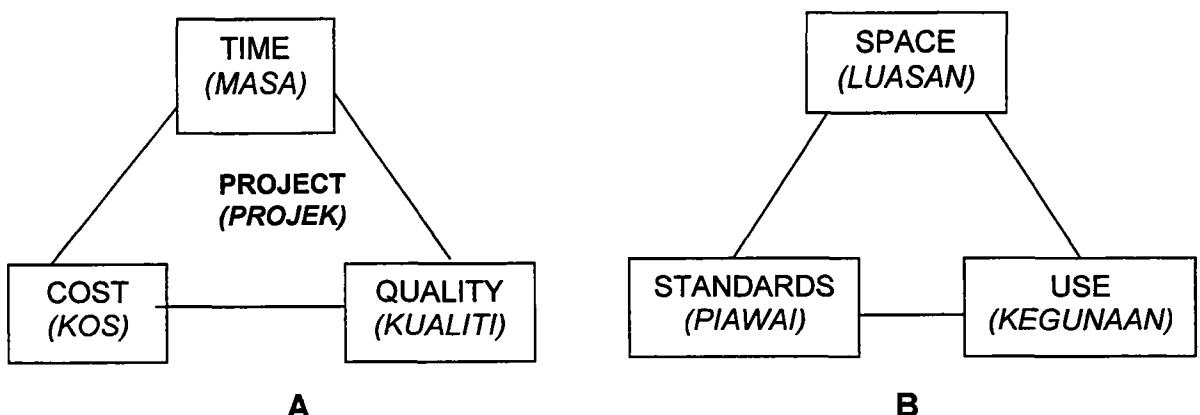

Bincangkan.

(9 marks/markah)

- (c) *Nyatakan dengan ringkas:-*

- (i) *Tujuan membuat anggaran*
(ii) *Peta Konsep Perancangan Kos, dengan menggunakan gambarajah.*

(7 marks/markah)

4. (a) Discuss the following:-

- Sketch A with regards to making decisions to commence construction.
- Sketch B with regards ensuring the viability of a particular project.

(10 marks/markah)

(b) By using illustrations, describe the Total Strategic Cost Management Process comprehensively and adequately and reconcile with Value Management aspects.

(10 marks/markah)

(c) Briefly describe the factors that influence costs at the design stage.

(5 marks/markah)

(a) *Bincangkan tentang kedua-dua lakaran di atas:-*

- *Lakaran A dari sudut untuk membuat keputusan utnuk membina.*
- *Lakaran B dari sudut memastikan sesuatu projek itu berdaya maju.*

(10 marks/markah)

(b) *Dengan menggunakan lakaran, jelaskan tentang Proses Pengurusan Kos Strategik yang komprehensif dan lengkap serta kaitkan dengan aspek Pengurusan Nilai.*

(10 marks/markah)

(c) *Dengan ringkas, nyatakan faktor-faktor yang mempengaruhi kos ditahap reka bentuk.*

(5 marks/markah)

ELEMENTAL COST ANALYSIS - Form 1		3 - Administrative Buildings A - 1 - 904
JOB TITLE LOCATION:	Proposed Jabatan Pengangkutan Jalan Regional Office, Kuching Kuching, Sarawak	CLIENT: Government TENDER DATE: 25-Jan-2004

INFORMATION ON TOTAL PROJECT

Project and Contract Information

Project Details and Site Conditions:

Construction of Administrative Buildings, Tester Office, Canteen, Waiting Shelters, Weighbridge Control, Guard House, Surau and Shelter for JPJ including infrastructure works. The site is located approximately 11 mile from Kuching city and is accessible.

Contract:

JKR with Quantities

Market Conditions: COMPETITIVE

Contract Particulars:	Cost Fluctuation	Competitive Tender List			
		Yes	No	RM	Int/JV/L
Type of Contract:		X		17,015,538.43	L
Basis of Tender	Open/Selected Competition	X	Government	:	
Bills of Quantities			Private	11,652,000.00	L
Bills of Approx. Quant.	Negotiated			11,300,000.00	L
Sched. Of Rates/ Spec & Drawings	Serial		Provisional Sum	11,289,000.00	L
Contract Period Stip. By Client:	18 months		Prime Cost Sum	11,234,117.00	L
Contract Period Offered by Builders:	18 months		Preliminaries	10,700,000.00	L
Number of Tenders Issued:	23		Contingencies	RM 220,000.00	
Number of Tenders Received:	23		Contract Sum	RM 10,700,000.00	

ANALYSIS OF SINGLE BUILDING

Design/Shape Information

Accommodation and Design Features:

Single storey building (Enforcement Office), reinforced concrete framed structure with metal deck roofing on steel pipe trusses and reinforced concrete gutters. The building comprise of General Office, Public Hall, Enforcement/Batching Store, Docket Room and toilets.

Areas	Functional Unit:	643 m2	Design/Shape
Lower Ground Floor	- m2		Percentage of Gross Floor Area:
Ground Floor	904 m2		a) Below Ground Floor Construction %
Upper Floor	- m2		b) Single Storey Construction 100%
GROSS FLOOR AREA	904 m2	External Wall Area = 656 Gross Floor Area = 904 = 0.726	c) 2-Storey Construction %
Usable Area	643 m2		d) 3-Storey Construction %
Circulation Area	176 m2		e) 4-Storey Construction %
Ancillary Area	70 m2		
Internal Division	15 m2		
GROSS FLOOR AREA	904 m2	Storey Heights Av. Below Ground Floor -- m	
Floor Space NOT Enclosed:	158 m2	At Ground Floor 3.35 m	
Roof Area: (Structural & Plant Rooms)	904 m2	Above Ground Floor -- m	

Brief Cost Information

Contract Sum	RM 1,376,408.53	Functional Unit Cost excl external works: (RM/m2)	1,271.38
Provisional Sum	RM nil		
Prime Cost Sum	RM nil		
Preliminaries	RM 38,113.59 being 2.91% of remainder		
Contingencies	RM 28,299.99 being 2.16% Contract Sum		
Contract Sum less Contingencies	RM 1,348,108.54

OGOS 2006

JABATAN PERANGKAAN MALAYSIA

DEPARTMENT OF STATISTICS, MALAYSIA

Tarikh:

Date : 15 September 2006

...19/-

**KETERANGAN TAMBAHAN TENTANG INDEKS KOS BAHAN BINAAN
BANGUNAN SEMENANJUNG MALAYSIA (JULAI 2002 = 100)**

Bermula dengan penerbitan Januari 2005, siri ini adalah berdasarkan kepada tahun asas yang ditukar daripada 1991 (Januari 1991 = 100) kepada 2002 (Julai 2002 = 100) serta pemilihan barang dan pemberat yang disemak semula oleh JKR.

Bagi kontrak-kontrak yang telah ditandatangani sebelum Januari 2005, sila lihat 'Jadual Faktor Pelarasian' (Lampiran A) dan 'Contoh Mengira Indeks Lama Kos Bahan Binaan Bangunan' (Lampiran B) untuk panduan dalam melaksanakan Syarat Perubahan Harga.

Bagi kontrak-kontrak mulai Januari 2005 dan seterusnya, indeks baru hendaklah digunakan terus tanpa sebarang pelarasian.

***ADDITIONAL EXPLANATION OF THE BUILDING MATERIAL COST
INDEX FOR PENINSULAR MALAYSIA (JULY 2002 = 100)***

Starting from January 2005 publication, the series is based on the revised base year which has been changed from 1991 (January 1991 = 100) to 2002 (July 2002 = 100) as well as the selection of new items and weights by JKR.

For contracts signed before January 2005, please refer to the 'Adjustment Factor Table' (Appendix A) and the 'Example For Calculating The Old Building Material Cost Index' (Appendix B) for the implementation of the Variation of Price Clause.

For contracts commencing January 2005 and thereafter, the new index is to be used without any further adjustment.

**KETERANGAN RINGKAS TENTANG INDEKS KOS BAHAN BINAAN
BANGUNAN SEMENANJUNG MALAYSIA
(JULAI 2002=100)**

Indeks Kos Bahan Binaan Bangunan (IKB) adalah suatu indeks untuk tujuan khusus yang berasaskan formula Laspeyres. Ianya dibentuk untuk mengukur kadar perubahan purata harga bahan-bahan binaan terpilih yang digunakan dalam lapan kategori bangunan untuk enam kawasan di Semenanjung Malaysia.

IKB adalah sesuai untuk penggunaan Syarat Perubahan Harga dalam kontrak-kontrak bangunan kerajaan sahaja. Spesifikasi dan pemberat untuk bahan-bahan binaan terpilih mengikut kategori bangunan, disediakan oleh Jabatan kerja Raya (JKR). Anggaran 4,300 sebutuharga dipungut setiap bulan daripada lebih kurang 760 outlet untuk 130 jenis bahan binaan terpilih.

NOTA TENTANG PENGIRAAN PERUBAHAN INDEKS

Indeks Kos Binaan Bangunan mengukur perubahan harga dari suatu tempoh rujukan yang ditetapkan, Julai 2002 yang mana menyamai 100.

Pergerakan Indeks Kos Bahan Binaan Bangunan dari satu bulan ke satu bulan yang lain dinyatakan sebagai perubahan peratus dan bukan perubahan mata indeks (*index points*) kerana perubahan mata indeks dipengaruhi oleh aras indeks yang berkaitan dengan tempoh asasnya, manakala perubahan peratus tidak mempunyai pengaruh sedemikian. Contoh berikut menunjukkan cara pengiraan perubahan peratus mata indeks dan perubahan peratus.

Peratus Mata Indeks

Indeks Kos Bahan Binaan
Bangunan 130.5

Tolak indeks sebelumnya 129.3

Perubahan Peratus

Perubahan mata indeks dibahagi
dengan indeks sebelumnya,
didarab dengan seratus

$$\frac{130.5 - 129.3}{129.3} \times 100 = 0.9\%$$

**BRIEF EXPLANATION OF THE BUILDING MATERIAL COST INDEX
FOR PENINSULAR MALAYSIA
(JULY 2002 = 100)**

The Building Material Cost Index (BCI) is a special purpose index which is based on the Laspeyres formula. It is designated to measure the average rate of change in prices of selected building materials utilized in eight categories of building in six regions of Peninsular Malaysia.

The BCI is relevant only for application of the Price variation Clause in government building contracts. The specifications and weightage pattern for selected building materials by category of building are determined by Public Works Department (JKR). Approximately 4,300 price quotations are collected monthly from about 760 outlets for 130 selected building material items.

NOTE ON CALCULATING INDEX CHANGES

The Building Cost Index measures price changes from a designated period, July 2002, which equals 100.

Movements of the Building Cost Index from one month to another are expressed as percentage changes rather than changes in index points because "index point" changes are affected by the level of the index in relation to its base period while percentage changes are not. The following example illustrates the computation of index point and percentage changes.

Index Point Change	Percentange Change
<i>Building Material Cost Index</i> 130.5	<i>Index point difference divided by the previous index, multiplied by one hundred</i>
<i>Less previous index</i> 129.3	
	<hr/>
<u>1.2</u>	$\frac{130.5 - 129.3}{129.3} \times 100 = 0.9\%$

**KETERANGAN TAMBAHAN MENGENAI INDEKS KOS BAHAN BINAAN
BANGUNAN SEMENANJUNG MALAYSIA (JAN. 1991 = 100)**

Bermula dengan penerbitan Januari 1995, siri ini adalah berdasarkan kepada tahun asas yang ditukar daripada 1980 (Januari 1980 = 100) kepada 1991 (Januari 1991 = 100) serta pemilihan barang dan pemberat yang disemak semula oleh JKR.

Bagi kontrak-kontrak yang telah ditandatangani sebelum Januari 1995, sila lihat 'Jadual Faktor Pelarasian' (Lampiran A) dan 'Contoh Mengira Indeks Lama Kos Bahan Binaan Bangunan' (Lampiran B), untuk panduan dalam melaksanakan Syarat Perubahan Harga.

Bagi kontrak-kontrak mulai Januari 1995 dan seterusnya, indeks baru hendaklah digunakan terus tanpa sebarang pelarasian.

**ADDITIONAL EXPLANATION OF THE BUILDING MATERIAL COST
INDEX FOR PENINSULAR MALAYSIA (JAN. 1991 = 100)**

Starting with the January 1995 publication, the series is based on the revised base year which has been changed from 1980 (Jan. 1980 = 100) to 1991 (Jan. 1991 = 100) as well as the selection of new items and weights carried out by JKR.

For contracts signed before January 1995, please refer to the 'Adjustment Factor Table' (Appendix A) and the 'Example For Calculating The Old (1980 base) Building Material Cost Index' (Appendix B) for the implementation of the Variation of Price Clause.

For contracts commencing January 1995 and thereafter, the new index is to be used without any further adjustment.

**KETERANGAN RINGKAS MENGENAI INDEKS KOS BAHAN BINAAN
BANGUNAN SEMENANJUNG MALAYSIA (JAN. 1991 = 100)**

Indeks Kos Bahan Binaan Bangunan (IKB) adalah suatu indeks untuk tujuan khusus yang berdasarkan formula Laspeyres. Ianya dibentuk untuk mengira kadar perubahan purata harga bahan-bahan binaan terpilih yang digunakan dalam lapan kategori bangunan untuk enam kawasan di Semenanjung Malaysia.

IKB adalah sesuai untuk penggunaan Syarat Perubahan Harga dalam kontrak-kontrak bangunan kerajaan sahaja. Spesifikasi dan pemberat untuk bahan-bahan binaan terpilih mengikut kategori bangunan, disediakan oleh Jabatan Kerja Raya. Anggaran 3,000 sebutharga dipungut setiap bulan daripada lebih kurang 550 outlet untuk 130 jenis bahan binaan terpilih.

NOTA TENTANG MENGIRA PERUBAHAN-PERUBAHAN INDEKS

IKB mengukur perubahan harga dari suatu tempoh rujukan yang ditetapkan, Januari 1991 yang mana menyamai 100.

Pergerakan Indeks Kos Bahan Binaan Bangunan dari sebulan ke sebulan yang lain dinyatakan sebagai perubahan peratus dan bukan perubahan mata indeks (index point) kerana perubahan mata indeks dipengaruhi oleh aras indeks yang berkaitan dengan tempoh asasnya, manakala perubahan peratus tidak mempunyai pengaruh sedemikian. Contoh berikut menunjukkan cara pengiraan perubahan mata indeks dan perubahan peratus.

Perubahan Mata Indeks	Perubahan Peratus
Indeks Kos Bahan Binaan Bangunan	130.5
Tolak	Perubahan mata indeks dibahagikan dengan indeks sebelumnya, didarab dengan seratus
Indeks Sebelumnya	129.3
	$\frac{130.5 - 129.3}{129.3} \times 100$
	1.2
	= 0.9%

... .30 /-

**BRIEF EXPLANATION OF THE BUILDING MATERIAL COST INDEX
FOR PENINSULAR MALAYSIA (JAN. 1991 = 100)**

The Building Material Cost Index (BCI) is a special purpose index which is based on the Laspeyres formula. It is designed to measure the average rate of change in prices of selected building materials utilised in eight categories of building in six regions of Peninsular Malaysia.

The BCI is relevant only for application of the Price Variation Clause in government building contracts. The specifications and weightage pattern of selected building materials by category of building, are determined by Jabatan Kerja Raya. Approximately 3,000 price quotations are collected monthly from about 550 outlets for 130 selected building material items.

NOTE ON CALCULATING INDEX CHANGES

The BCI measures price changes from a designated period, January 1991 which equals 100.

Movements of the Building Material Cost Index from one month to another are expressed as percentage changes rather than changes in index points because 'index point' changes are affected by the level of the index in relation to the base period while percentage changes are not. The following example illustrates the computation of index point and percentage changes.

<i>Index Point Change</i>	<i>Percentage Change</i>
<i>Building Material Cost Index 130.5</i>	<i>Index point difference divided by the previous index, multiplied by one hundred</i>
<i>Less</i>	
<i>Previous Index</i>	<i>129.3</i>
	<hr/>
	<i>1.2</i>
	<hr/>
	<i>130.5 – 129.3</i>
	<hr/>
	<i>x 100</i>
	<i>129.3</i>
	<i>= 0.9%</i>

NEGERI SEMBILAN DAN MELAKA**

D = JOHOR

E = PAHANG

F = KELANTAN DAN TERENGGANU

LAMPIRAN B

**Additional Details
(Butiran-Butiran Lanjutan)**

LAMPIRAN B**Additional Details**

1. Professional Fees – 10% of the Overall Total Costs.
2. Preliminaries – 3% of the Total Construction Costs.
3. Contingencies – 5% of the Total Construction Costs (including Preliminaries).
4. Contractor's 'Profit & Attendance' on services – 3% of the Total Costs of Services.
5. Builder's work in Connection with Services – 3% of the Total Costs of Services.
6. Plan Fees and Development charges RM10.00 per metre square based on Gross Floor Area (GFA).
7. Contributions to Local Authorities – RM300,000.00.
8. Land Costs – RM650/- per metre sq.
9. Quantity Surveyor's new estimates:-
 - (a) Services – P.C. Sums

<ul style="list-style-type: none"> • Sanitary Installation • Plumbing Installation • Air Condition/Ventilation Installation • Electrical Installation • Fire-Fighting Installation • Special Installation - Security System • Communication Installation 	<ul style="list-style-type: none"> - RM20,000.00 - RM40,000.00 - RM75,000.00 - RM165,000.00 - RM50,000.00 - RM25,000.00 - RM15,000.00
---	--

Sambungan... LAMPIRAN B

(b) Other Elements

• Piling Works	- RM60,000.00
• Basement Works	- Add RM150,000.00 to the new elemental costs
• Upper Floors	- RM150/- per m ²
• Stairs	- RM18,000.00
• Roof	- RM208,000.00
• External Walls	- RM230,000.00
• Fittings & Furnishings	- RM180,000.00
• Site Works	- RM20,000.00
• Drainage	- RM70,000.00
• Ext. Works by TNB, Telecoms	- RM60,000.00
• Therapeutic Pool	- RM50,000.00

10. Others

- The Guide Cost Analysis contains specifications similar to the new project.
- You are required to use the building index which closely reflects the same building classification and ensure the indices are reconciled appropriately.
- Assume that the referred indices can be utilized 'intra-regional'.
- For computation of the base index, utilize the index of Month/Year 2004, Kuala Lumpur region, but add 8.0 index points.

LAMPIRAN B***Butiran-Butiran Lanjutan***

1. Bayaran Ikhtisas – 10% daripada Jumlah Kos Keseluruhan.
2. Preliminaries – 3% daripada Jumlah Kos Pembinaan.
3. Kontingensi – 5% daripada Jumlah Kos Pembinaan (termasuk Preliminaries).
4. 'Profit & Attendance' Pembina terhadap perkhidmatan – 2% daripada Jumlah Kos Perkhidmatan-Perkhidmatan.
5. Kerja-Kerja Pembina yang bersangkutan dengan perkhidmatan – 3% daripada Jumlah Kos Perkhidmatan-Perkhidmatan.
6. Yuran Pelan dan Pembangunan kadanya adalah RM10.00 semeter persegi berasaskan Jumlah Keluasan Lantai Kasar (GFA).
7. Bayaran sumbangan kepada pihak-pihak berkuasa – RM300,000.00.
8. Harga Tanah – RM 650/- per metre sq.
9. Anggaran-Anggaran Terbaru oleh Juruukur Bahan.

(a) *Perkhidmatan-Perkhidmatan – P.C. Sums*

- Pemasangan Sanitari - RM20,000.00
- Pemasangan Air - RM40,000.00
- Pemasangan-Pemasangan Khas
 - Sistem Sekuriti - RM25,000.00
 - Pemasangan Elektrik - RM165,000.00
 - Pemasangan Cegah Kebakaran - RM50,000.00
 - Penghawa Dingin/
Sistem Pengudaraan - RM75,000.00
 - Pemasangan Komunikasi - RM15,000.00

Sambungan... LAMPIRAN B(b) *Elemen-Elemen Lain*

- | | |
|---|---|
| <ul style="list-style-type: none"> • Kerja-Kerja Cerucuk • Kerja 'Basement' • Lantai-Lantai Atasan • Tangga • Bumbung • Dinding Luar • Pasangan Keperabotan • Kerja-kerja luar (tapak) • Perparitan/Saliran • Kerja-Kerja Luar TNB, Telekom • Kolam Terapi | <ul style="list-style-type: none"> - RM60,000.00 - Tambah RM150,000.00 kepada Jumlah Kos Elemen Terbaru - RM150/- per m² - RM18,000.00 - RM208,000.00 - RM230,000.00 - RM180,000.00 - RM20,000.00 - RM70,000.00 - RM60,000.00 - RM50,000.00 |
|---|---|

10. *Lain-Lain*

- *Analisis Kos Panduan mempunyai penentuan yang lebih kurang sama dengan projek baru ini.*
- *Anda dikehendaki menggunakan indeks bangunan yang hampir sekali dari segi pengelasannya serta pastikan indeks diselaraskan dengan wajar.*
- *Indeks yang dirujuk, tidak boleh digunakan secara 'intra-regional'.*
- *Untuk dapatkan indeks asas, gunakan indeks Bulan/Tahun 2004 Kawasan Kuala Lumpur, tapi tambahkan sebanyak 8.0 mata.*

- 40 -
