[*Sekiranya terdapat sebarang percanggahan pada soalan peperiksaan, versi Bahasa Inggeris hendaklah digunakan.*]

- 2 -

1. [a] Discuss the epidemiology, clinical manifestations and transmission of Chagas disease.

*[Bincangkan epidemiologi, manifestasi klinikal dan penularan penyakit Chagas.]*

(10 marks /10 markah)

- [b] Determine the mechanisms and implications of *Trypanosoma brucei*'s ability to exhibit variant surface glycoprotein (VSG) variation in immune evasion, antigenic variation and disease persistence.

*[Tentukan mekanisme dan implikasi keupayaan Trypanosoma brucei untuk memperlihatkan variasi glikoprotein permukaan varian (VSG) dalam pengelakan imun, variasi antigenik dan penyakit berterusan.]*

(15 marks /15 markah)

2. [a] Discuss the methods to diagnose *Naegleria fowleri* infection.

*[Bincangkan kaedah untuk mendiagnos jangkitan Naegleria fowleri.]*

(10 marks / 10 markah)

- [b] Investigate the pathogenesis of *Entamoeba histolytica* infection in patients that went through colonic irrigation that suffers from both intestinal and hepatic amoebiasis.

*[Siasat patogenesis jangkitan Entamoeba histolytica pada pesakit yang melalui irigasi kolon yang mengalami kedua-dua amoebiasis usus dan amoebiasis hepatik.]*

(15 marks / 15 markah)

3. [a] Explain clinical signs and symptoms of cryptosporidiosis in immunocompromised hosts.

*[Terangkan tanda klinikal dan simptom criptosporidiosis pada perumah terimunokompromi.]*

(10 marks /10 markah)

- 3 -

- [b] A man was brought to the hospital because he experienced nausea, vomiting, abdominal pain, and diarrhea after eating a raw steak at the restaurant five hours prior. Further investigation of the steak sample in the restaurant revealed the presence of muscular cysts in the meat.  
*[Seorang lelaki telah dibawa ke hospital kerana mengalami mual, muntah, sakit perut, dan cirit-birit selepas makan stik mentah di restoran lima jam sebelumnya. Siasatan lanjut ke atas sampel stik di restoran itu mendedahkan kehadiran sista otot dalam daging tersebut.]*

Based on the situation above, identify the disease and justify your answer. Offer recommendations for its treatment and control.

*[Berdasarkan situasi di atas, kenal pasti penyakitnya dan justifikasikan jawapan anda. Cadangkan rawatan dan kawalannya.]*

(15 marks /15 markah)

4. [a] Discuss the pathogen, clinical manifestations and transmission of Kala-Azar disease.

*[Bincangkan patogen, manifestasi klinikal dan penularan penyakit Kala-Azar.]*

(10 marks /10 markah)

- [b] Determine the latest methods of protozoan infection treatments.

*[Tentukan kaedah terkini rawatan jangkitan protozoa.]*

(15 marks /15 markah)

5. [a] Elaborate the different types of microsporidia transmission and the control of microsporidiosis.

*[Huraikan jenis penularan mikrosporidia yang berbeza dan kawalan mikrosporidiosis.]*

(10 marks /10 markah)

- 4 -

- [b] Determine how gestational age influences fetal outcomes in congenital toxoplasmosis. Identify the clinical signs and symptoms of the infection.  
*[Tentukan bagaimana umur kehamilan mempengaruhi hasil janin dalam toksoplasmosis kongenital. Kenal pasti tanda klinikal dan simptom jangkitan tersebut.]*

(15 marks /15 markah)
